

20260523 On Hiding Their Identities Addresses and Actions

Just for the public record to understand, these criminals that spy on my life 24/7 365 also have the added benefits of having their identities shielded from public scrutiny, their home addresses and contact information made private as non-public information, and they also have strict protections afforded to them for any business related information that you can obtain about them through the financial disclosures which are required by law to be made public record (one of very few 'checks and balances' afforded to the community to hold these human beings accountable to some form of oversight or guidance).

Their oversight basically consists *only* of inter-agency reviews and reports. They have no God - I can assure you very clearly of that.

Unfortunately, for all of America (and honestly, the entire world), the worst group of childish spies, creeps, abusers, and generally threatening power-hungry people has found its way into the offices that are supposed to be occupied by honorable and noble community-minded individuals.

The government is long lost to criminals, America. If more and more people do not stand up and begin asking for answers, they will continue to press people like me into a ghetto, and then into a concentration camp - again.

There is no 'America' coming to save us from 'Amerikkka'.

This was the country that saved the world once from Nazi-ism.

Who will be coming to save us again?

So far, it's just me. The second savior of the world. In all honesty, many, many, saviors have stood up and helped to guide the world away from this evil - one generation at a time. But right here and right now. I certainly feel like the Second Coming of Christ being crucified once again while I attempt to bring out the truth from within a community of corrupted political, military, and religious 'officials.'
